

Website Plan Template

1. Planned Pages (Site Map Draft)

List all the pages you plan to include. Include the title of the page, and file name. For example: title is Homepage, filename is index.html

Filename is index.html, css file is styles.css, title is Website Development Resources, homepage is home.html, resources is resources.html, drop down menu -> Code editor.html, HTML - semantic elements.html, CSS – Layout.html, CSS - Responsive design.html, Accessibility.html, Validation for HTML and CSS code.html

2. Content Details for Each Page

Provide a 2–4 sentence description of what content you will include on each page.

I will provide images, videos, and links. A description on why I find these resources helpful. They will all have a back to top button to navigate easier, including a navbar dropdown menu.

3. Planned Media & Assets

List any images, icons, videos, tables, or forms you plan to include.

- Images: **screenshots.png**
 - Icons: **homepage, avatar**
 - Videos (optional): **youtube.com**
 - Tables or Lists: **none**
 - Forms (e.g., contact form): **none**
-

4. Navigation Plan

How will users move through your site?

- Navigation menu labels:
(E.g., Home, About, Gallery, Contact)

Home, Resources

- Footer links (optional):
Back to top page button, github profile, homepage link, main resources link
-

5. Accessibility Considerations Answer briefly:

1. What images will need alt text?

Every image

2. How will you structure your headings (H1, H2, H3) on each page?

On top

3. Will you use color combinations that meet contrast guidelines?

☐ **Yes** ☐ Working on it

6. File and Folder Plan

Outline how you plan to organize your project files.

/project-folder

index.html

/css

styles.css

/pages

home.html

resources.html

/img

Screenshot.png

Avatar.png

7. Code Validation

Outline how you plan to validate and correct your HTML and CSS code if necessary.

I will be using W3C CSS Validator and the WAVE Web Accessibility Evaluation Tool
